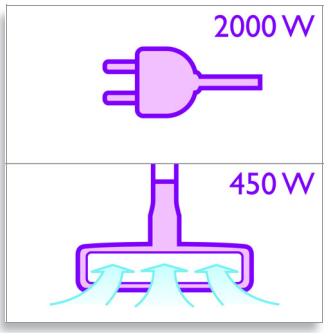
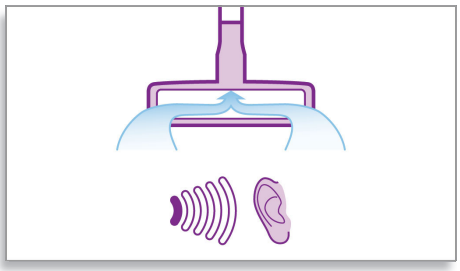
Highlights

2000 Watt motor



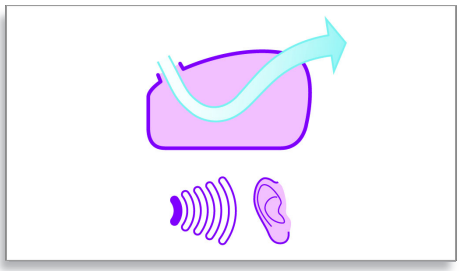
Powerful 2000 Watt motor generates the maximum 450 Watt suction power for superior cleaning results

SilentSeal nozzle



The SilentSeal nozzle contributes to an optimal performance in both low noise and dust and fluff pick up. It is optimally sealed for efficient airflow resulting in the best cleaning performance — made by WesselWerk.

Aerodynamic air channel

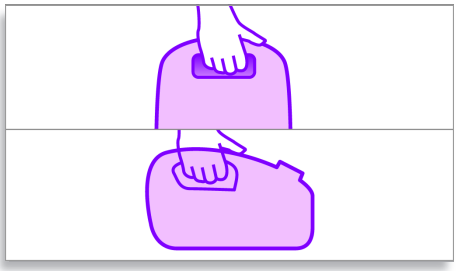


The air channel has been fine tuned to ensure that the air can escape with minimum noise. Additionally, a special motor suspension reduces vibrations.

HEPA AirSeal, HEPA 13 filter

This vacuum cleaner has been designed in such a way that all the air taken in is passed through the washable HEPA 13 filter (99.95% filtration) before it is exhausted. No escape is possible.

Comfortable carrying handles



This vacuum cleaner has not one, but two carrying handles. When it is on its wheels, there is a handle on top which enables you to easily move the cleaner around with very little bending. The second handle on the front side of the appliance enables you to comfortably carry it around in an upright position.
